Fund analytics report

As at 01-10-2026. Period: All available history.

Version 5, made 05-10-2026, 9:30 am UTC

> This is a saved report: it does not change when prices are later corrected. Generate a new version to include them.

4 funds analysed. The fund's own growth and your own return are different things and are shown separately for each fund.

Your funds at a glance

Fund	Value now	Gain or loss	Your return (XIRR)	Fund CAGR, 3 year
Aster Large Cap Fund	₹7,431	₹1,785	2.70%	5.08% [a]
Birch Flexi Cap Fund	₹16,784	₹5,844	4.27%	10.49% [a]
Cedar Mid Cap Fund	₹5,743	₹3,624	10.30%	4.06% [a]
Dune Corporate Bond Fund	₹9,624	₹5,326	8.30%	12.84% [a]

a Prices are not published every day. Where a start or end date had no price, the latest earlier price (within 10 days) was used; each fund's own page shows the dates actually used. The same applies to every cell carrying this mark.

Prices are published by AMFI and run to 01-10-2026.

Notes

Note 1 Sharpe and Sortino compare each fund with the RBI 91-day Treasury bill rate (source: Reserve Bank of India).

Note 2 Figures are as at 01-10-2026. Prices are published by AMFI. This is information, not a recommendation to buy, sell or switch.

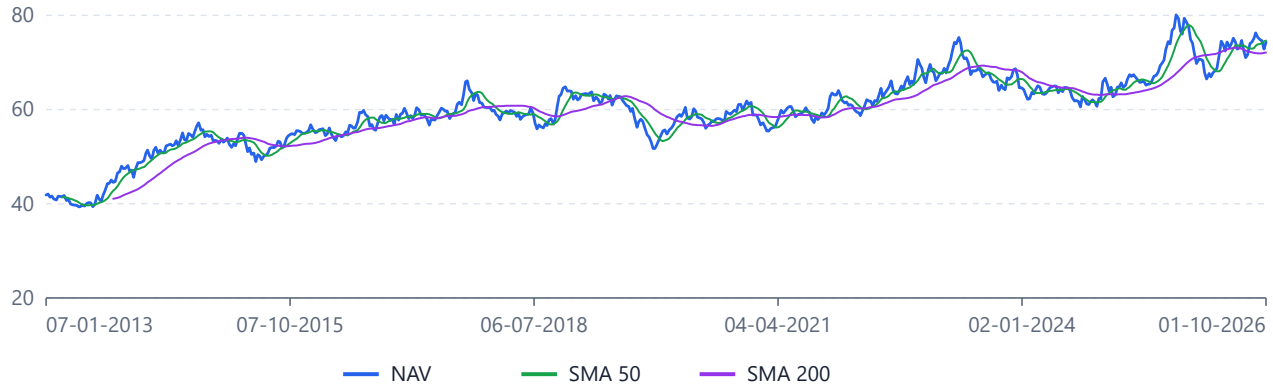

How to read this report

- Scheme CAGR (the fund's own growth, not your personal return)
- Your return (XIRR, based on when your own money went in and came out)
- In this report a year is 365.2425 days (the average calendar year), and a period of a year or more is annualised over the days actually between the two prices. The Performance tab counts a year as 365 days and starts annualising only once a period is longer than 365 days, so the same fund can show a slightly different annualised figure on the two screens. Both are correct for the convention they state.
- A figure that cannot be worked out is shown as a plain label, never as zero, and a small letter beside it points to the explanation printed once at the foot of that page.
- Dates are written day first.

Aster Large Cap Fund

Large Cap - direct plan - growth

At a glance	Value	Detail
Price history	3,588 prices	01-01-2013 to 01-10-2026
Latest price (NAV)	74.3145	on 01-10-2026
Value now	₹7,431	units x latest NAV, NAV of 01-10-2026
Amount you put in	₹5,646	first on 14-06-2016
Gain or loss	₹1,785	
Your return (XIRR, a year)	2.70%	14-06-2016 to 01-10-2026

The chart shows a sample of the daily prices; the figures use every price.

The fund's own growth

Scheme CAGR (the fund's own growth, not your personal return)

Period	Total return	CAGR (a year)	Dates used
1 year	-7.20%	-7.20%	01-10-2025 to 01-10-2026
3 year	16.07% [a]	5.08% [a]	29-09-2023 to 01-10-2026
5 year	25.32%	4.62%	01-10-2021 to 01-10-2026

Rolling returns

Every available window, not a single start date.

Window	Median	Lowest	Highest	Windows above zero
1M	0.44%	-9.85%	11.92%	54.75%
3M	1.05%	-16.23%	21.14%	57.38%
6M	2.05%	-19.52%	26.00%	61.49%
1Y	4.25%	-21.29%	39.24%	70.33%
3Y	3.00%	-4.67%	14.87%	78.79%
5Y	2.39%	-1.22%	8.72%	94.75%

a Prices are not published every day. Where a start or end date had no price, the latest earlier price (within 10 days) was used; each fund's own page shows the dates actually used. The same applies to every cell carrying this mark.

Aster Large Cap Fund (continued)

Risk and risk-adjusted measures

Over the report period, from daily prices.

Measure	Value	Basis
Volatility (annualised)	11.43%	from 3587 daily returns
Sharpe ratio	-0.12	RBI 91-day T-bill, see note 1
Sortino ratio	-0.17	RBI 91-day T-bill, see note 1
Maximum drawdown	-23.72%	peak 29-09-2017, low 12-11-2019, recovered 16-09-2022

Beta and alpha: not available yet (no benchmark index is linked to this fund).

Trend

Latest value of each average, counted in price observations (not calendar days).

Measure	Latest	As at
SMA 20	73.9548	01-10-2026
SMA 50	74.6558	01-10-2026
SMA 100	73.8362	01-10-2026
SMA 200	72.1258	01-10-2026
EMA 20	74.0602	01-10-2026
EMA 50	74.1568	01-10-2026
Rate of change, 20 prices	0.02%	01-10-2026
Highest NAV in the period	80.1011 [a]	26-09-2025
Lowest NAV in the period	38.5453 [a]	23-05-2013
Average NAV (mean / median)	59.6988 / 59.6021 [a]	describes prices, not a return

Your own money in this fund

Your return (XIRR, based on when your own money went in and came out)

Measure	Value	Detail
Your return (XIRR, a year)	2.70%	14-06-2016 to 01-10-2026
Value now	₹7,431	units x latest NAV, NAV of 01-10-2026
Amount you put in	₹5,646	first on 14-06-2016
Amount you took out	₹0	
Gain or loss	₹1,785	

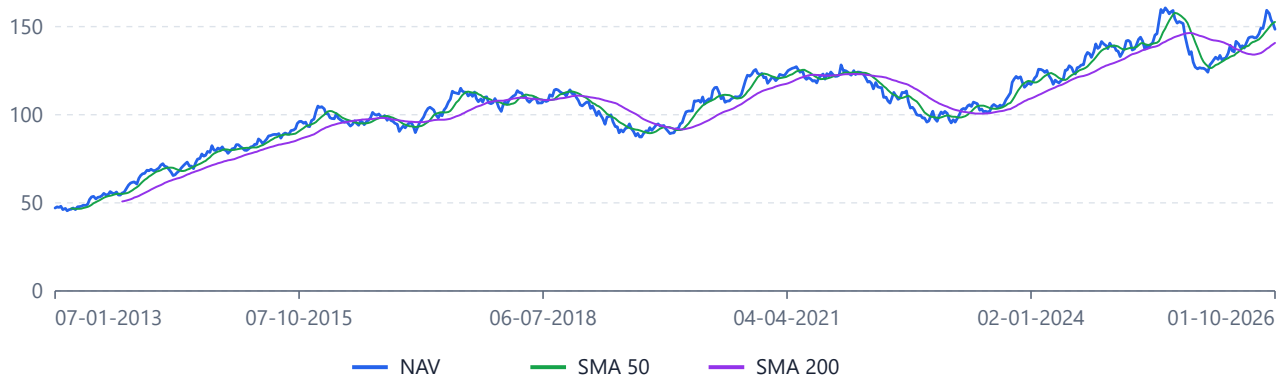

The fund's own growth figures (such as CAGR, rolling returns, volatility and drawdown) show how the scheme performed whatever day anyone invested. Your return (XIRR) shows what you actually earned, because it follows the dates and amounts of your own investments and withdrawals. The two usually differ, and a difference does not mean either is wrong.

a NAV levels cannot be compared between schemes, and a lower NAV does not mean a cheaper or better fund. The same applies to every cell carrying this mark.

Birch Flexi Cap Fund

Flexi Cap - direct plan - growth

At a glance	Value	Detail
Price history	3,588 prices	01-01-2013 to 01-10-2026
Latest price (NAV)	148.5281	on 01-10-2026
Value now	₹16,784	units x latest NAV, NAV of 01-10-2026
Amount you put in	₹10,940	first on 07-07-2016
Gain or loss	₹5,844	
Your return (XIRR, a year)	4.27%	07-07-2016 to 01-10-2026

The chart shows a sample of the daily prices; the figures use every price.

The fund's own growth

Scheme CAGR (the fund's own growth, not your personal return)

Period	Total return	CAGR (a year)	Dates used
1 year	5.12%	5.13%	01-10-2025 to 01-10-2026
3 year	34.97% [a]	10.49% [a]	29-09-2023 to 01-10-2026
5 year	19.61%	3.65%	01-10-2021 to 01-10-2026

Rolling returns

Every available window, not a single start date.

Window	Median	Lowest	Highest	Windows above zero
1M	0.78%	-11.46%	14.29%	57.90%
3M	2.60%	-22.11%	24.18%	64.13%
6M	5.25%	-24.14%	35.44%	69.27%
1Y	10.70%	-23.83%	55.24%	68.11%
3Y	4.82%	-4.87%	31.09%	80.25%
5Y	4.61%	-2.73%	19.98%	85.64%

a Prices are not published every day. Where a start or end date had no price, the latest earlier price (within 10 days) was used; each fund's own page shows the dates actually used. The same applies to every cell carrying this mark.

Birch Flexi Cap Fund (continued)

Risk and risk-adjusted measures

Over the report period, from daily prices.

Measure	Value	Basis
Volatility (annualised)	12.45%	from 3587 daily returns

EMA 50	68.4867	01-10-2026
Rate of change, 20 prices	0.32%	01-10-2026
Highest NAV in the period	69.6037 [a]	09-09-2026
Lowest NAV in the period	26.6238 [a]	10-01-2013
Average NAV (mean / median)	40.5963 / 39.1976 [a]	describes prices, not a return

Your own money in this fund

Your return (XIRR, based on when your own money went in and came out)

Measure	Value	Detail
Your return (XIRR, a year)	8.30%	24-08-2016 to 01-10-2026
Value now	₹9,624	units x latest NAV, NAV of 01-10-2026
Amount you put in	₹4,298	first on 24-08-2016
Amount you took out	₹0	
Gain or loss	₹5,326	

The fund's own growth figures (such as CAGR, rolling returns, volatility and drawdown) show how the scheme performed whatever day anyone invested. Your return (XIRR) shows what you actually earned, because it follows the dates and amounts of your own investments and withdrawals. The two usually differ, and a difference does not mean either is wrong.

a NAV levels cannot be compared between schemes, and a lower NAV does not mean a cheaper or better fund. The same applies to every cell carrying this mark.

Comparing your funds

Your held schemes: only the funds you hold are compared with each other, and only against funds of the same category, plan and option.

Ranked by CAGR, 1 year

Not applicable: None of your held schemes has a comparable peer among your other schemes, so no ranking is shown.

Ranked by CAGR, 3 year

Not applicable: None of your held schemes has a comparable peer among your other schemes, so no ranking is shown.

Ranked by CAGR, 5 year

Not applicable: None of your held schemes has a comparable peer among your other schemes, so no ranking is shown.

How closely two of your funds move together

Fund A	Fund B	Correlation	Common returns	Period
Aster Large Cap Fund	Birch Flexi Cap Fund	-0.01	3,587	01-01-2013 to 01-10-2026
Aster Large Cap Fund	Cedar Mid Cap Fund	0.01	3,587	01-01-2013 to 01-10-2026
Aster Large Cap Fund	Dune Corporate Bond Fund	0.00	3,587	01-01-2013 to 01-10-2026
Birch Flexi Cap Fund	Cedar Mid Cap Fund	0.00	3,587	01-01-2013 to 01-10-2026
Birch Flexi Cap Fund	Dune Corporate Bond Fund	0.00	3,587	01-01-2013 to 01-10-2026
Cedar Mid Cap Fund	Dune Corporate Bond Fund	0.00	3,587	01-01-2013 to 01-10-2026

A correlation near 1 means the two funds usually rise and fall together; near 0, little relationship; below 0, they tend to move in opposite directions. It describes past returns only.

How this was calculated

Risk-free rate: RBI 91-day Treasury bill auction cut-off yield. 6.2% a year was in force at the start of the period (auction of 31-12-2012) and 6.2% at its end (auction of 28-09-2026), taken as the latest published rate on or before each date, never interpolated, and converted to a daily rate as (1 + yield) ^ (1 / 252) - 1. Source: Reserve Bank of India.
