Fund analytics report

As at 01-10-2026. Period: All available history.

Version 5, made 05-10-2026, 9:30 am UTC

> This is a saved report: it does not change when prices are later corrected. Generate a new version to include them.

8 funds analysed. The fund's own growth and your own return are different things and are shown separately for each fund.

Your funds at a glance

Fund	Value now	Gain or loss	Your return (XIRR)	Fund CAGR, 3 year
Aster Diversified Equity and Debt Hybrid Opportunities Allocation Fund - Direct Plan - Growth Option (formerly the Dune Balanced Advantage Fund)	₹7,431	₹1,785	2.70%	5.08% [a]
Birch Flexi Cap Fund	₹0	₹1,969	1.73%	10.49% [a]
Cedar Mid Cap Fund	₹2,313	₹166	9.84%	Insufficient history [b]
Dune Corporate Bond Fund	₹9,624	₹5,326	8.30%	12.84% [a]
Elm Gilt Fund	₹17,404	₹11,721	11.78%	11.98% [a]
Fjord ELSS Fund	₹13,201	-₹1,221	-1.21%	6.64% [a]
Grove Large Cap Fund				Insufficient history [b]
Harbor Flexi Cap Fund	₹15,905	₹6,802	5.83%	-0.71% [a]

a Prices are not published every day. Where a start or end date had no price, the latest earlier price (within 10 days) was used; each fund's own page shows the dates actually used. The same applies to every cell carrying this mark.

b There is no published price on or within 10 days before 01-10-2023, so the return for this period is not shown. Nothing has been estimated. The same applies to every cell carrying this mark; each names its own date.

Prices are published by AMFI and run to 01-10-2026.

Notes

Note 1 Sharpe and Sortino compare each fund with the RBI 91-day Treasury bill rate (source: Reserve Bank of India).

Note 2 Figures are as at 01-10-2026. Prices are published by AMFI. This is information, not a recommendation to buy, sell or switch.

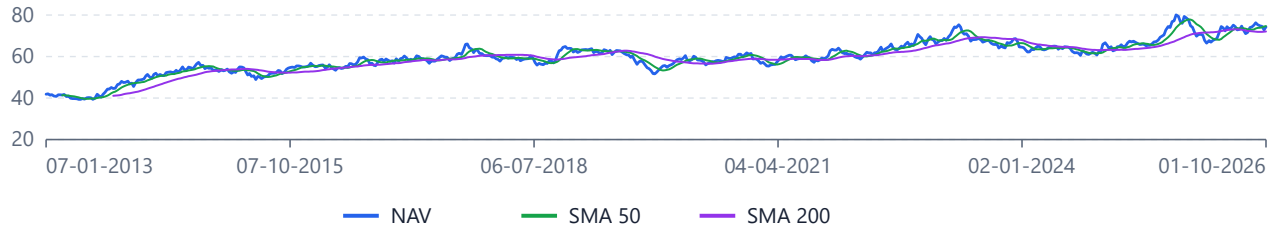

How to read this report

- Scheme CAGR (the fund's own growth, not your personal return)
- Your return (XIRR, based on when your own money went in and came out)
- In this report a year is 365.2425 days (the average calendar year), and a period of a year or more is annualised over the days actually between the two prices. The Performance tab counts a year as 365 days and starts annualising only once a period is longer than 365 days, so the same fund can show a slightly different annualised figure on the two screens. Both are correct for the convention they state.
- A figure that cannot be worked out is shown as a plain label, never as zero, and a small letter beside it points to the explanation printed once at the foot of that page.
- Dates are written day first.

Aster Diversified Equity and Debt Hybrid Opportunities Allocation Fund - Direct Plan - Growth Option (formerly the Dune Balanced Advantage Fund)

Large Cap - direct plan - growth

Price history 3,588 prices, 01-01-2013 to 01-10-2026. **Latest price (NAV)** 74.3145 on 01-10-2026.

The chart shows a sample of the daily prices; the figures use every price.

Aster Diversified Equity and Debt Hybrid Opportunities Allocation Fund - Direct Plan - Growth Option (formerly the Dune Balanced Advantage Fund): returns, risk and your own money

The fund's own growth

Scheme CAGR (the fund's own growth, not your personal return)

Period	Total return	CAGR (a year)	Dates used
1 year	-7.20%	-7.20%	01-10-2025 to 01-10-2026
3 year	16.07% [a]	5.08% [a]	29-09-2023 to 01-10-2026
5 year	25.32%	4.62%	01-10-2021 to 01-10-2026

Rolling returns

Every available window, not a single start date.

Window	Median	Lowest	Highest	Windows above zero
1M	0.44%	-9.85%	11.92%	54.75%
3M	1.05%	-16.23%	21.14%	57.38%
6M	2.05%	-19.52%	26.00%	61.49%
1Y	4.25%	-21.29%	39.24%	70.33%
3Y	3.00%	-4.67%	14.87%	78.79%
5Y	2.39%	-1.22%	8.72%	94.75%

Risk and risk-adjusted measures

Over the report period, from daily prices.

Measure	Value	Basis
Volatility (annualised)	11.43%	from 3587 daily returns
Sharpe ratio	-0.12	RBI 91-day T-bill, see note 1
Sortino ratio	-0.17	RBI 91-day T-bill, see note 1
Maximum drawdown	-23.72%	peak 29-09-2017, low 12-11-2019, recovered 16-09-2022

Beta and alpha: not available yet (no benchmark index is linked to this fund).

Your own money in this fund

Your return (XIRR, based on when your own money went in and came out)

Measure	Value	Detail
Your return (XIRR, a year)	2.70%	14-06-2016 to 01-10-2026
Value now	₹7,431	units x latest NAV, NAV of 01-10-2026
Amount you put in	₹5,646	first on 14-06-2016
Amount you took out	₹0	
Gain or loss	₹1,785	

The fund's own growth figures (such as CAGR, rolling returns, volatility and drawdown) show how the scheme performed whatever day anyone invested. Your return (XIRR) shows what you actually earned, because it follows the dates and amounts of your own investments and withdrawals. The two usually differ, and a difference does not mean either is wrong.

Trend

Latest value of each average, counted in price observations (not calendar days).

Measure	Latest	As at
SMA 20	73.9548	01-10-2026

The fund's own growth figures (such as CAGR, rolling returns, volatility and drawdown) show how the scheme performed whatever day anyone invested. Your return (XIRR) shows what you actually earned, because it follows the dates and amounts of your own investments and withdrawals. The two usually differ, and a difference does not mean either is wrong.

Trend

Latest value of each average, counted in price observations (not calendar days).

Measure	Latest	As at
SMA 20	81.4999	01-10-2026
SMA 50	79.4870	01-10-2026
SMA 100	78.6031	01-10-2026
SMA 200	75.8949	01-10-2026
EMA 20	80.7310	01-10-2026
EMA 50	79.8875	01-10-2026
Rate of change, 20 prices	-1.89%	01-10-2026
Highest NAV in the period	89.8640 [b]	21-05-2019
Lowest NAV in the period	47.6512 [b]	28-09-2015
Average NAV (mean / median)	67.3652 / 68.8894 [b]	describes prices, not a return

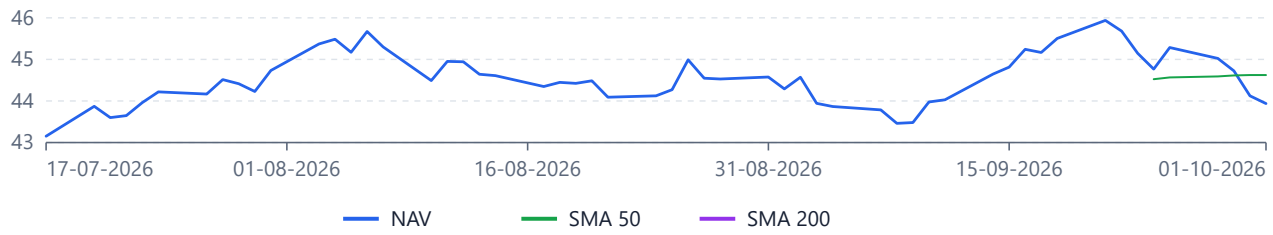

a Prices are not published every day. Where a start or end date had no price, the latest earlier price (within 10 days) was used; each fund's own page shows the dates actually used. The same applies to every cell carrying this mark.

b NAV levels cannot be compared between schemes, and a lower NAV does not mean a cheaper or better fund. The same applies to every cell carrying this mark.

Grove Large Cap Fund

direct plan - growth

Price history 55 prices, 17-07-2026 to 01-10-2026. **Latest price (NAV)** 43.9403 on 01-10-2026.

Grove Large Cap Fund: returns, risk and your own money

The fund's own growth

Scheme CAGR (the fund's own growth, not your personal return)

Period	Total return	CAGR (a year)	Dates used
1 year	Insufficient history [a]	Insufficient history [a]	
3 year	Insufficient history [a]	Insufficient history [a]	
5 year	Insufficient history [a]	Insufficient history [a]	

Rolling returns

Every available window, not a single start date.

Window	Median	Lowest	Highest	Windows above zero
1M	Summary withheld [b]	Summary withheld [b]	Summary withheld [b]	Summary withheld [b]
3M	Insufficient history [a]	Insufficient history [a]	Insufficient history [a]	Insufficient history [a]
6M	Insufficient history [a]	Insufficient history [a]	Insufficient history [a]	Insufficient history [a]
1Y	Insufficient history [a]	Insufficient history [a]	Insufficient history [a]	Insufficient history [a]
3Y	Insufficient history [a]	Insufficient history [a]	Insufficient history [a]	Insufficient history [a]
5Y	Insufficient history [a]	Insufficient history [a]	Insufficient history [a]	Insufficient history [a]

Risk and risk-adjusted measures

Over the report period, from daily prices.

Measure	Value	Basis
Volatility (annualised)	13.08% [c]	from 54 daily returns
Sharpe ratio	Insufficient history [a]	
Sortino ratio	Insufficient history [a]	
Maximum drawdown	-4.83% [d]	peak 06-08-2026, low 08-09-2026, recovered 21-09-2026

Beta and alpha: not available yet (no benchmark index is linked to this fund).

Your own money in this fund

Your own return is not shown for this fund because your transactions and holding could not be matched to it.

Trend

Latest value of each average, counted in price observations (not calendar days).

Measure	Latest	As at
SMA 20	44.6301	01-10-2026
SMA 50	44.6232	01-10-2026
SMA 100	Insufficient history [a]	
SMA 200	Insufficient history [a]	
EMA 20	44.6942	01-10-2026
EMA 50	44.5376	01-10-2026
Rate of change, 20 prices	-0.01%	01-10-2026
Highest NAV in the period	45.9360 [e]	21-09-2026
Lowest NAV in the period	43.1503 [e]	17-07-2026
Average NAV (mean / median)	44.5344 / 44.5143 [e]	describes prices, not a return

[a] There is no published price on or within 10 days before 01-10-2025, so the return for this period is not shown. Nothing has been estimated. The same applies to every cell carrying this mark; each names its own date.

[b] Only 34 rolling window(s) fit in this period: too few to summarise. The same applies to every cell carrying this mark.

[c] This figure rests on 54 observations; 60 or more would make it more reliable.

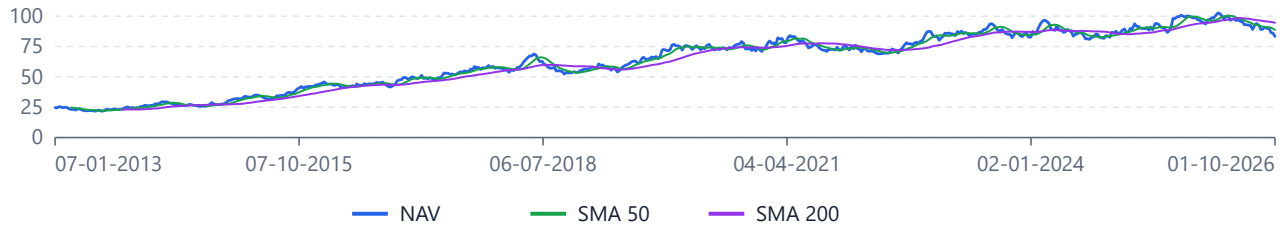

[d] This drawdown is measured over only 76 days, a short period.

[e] NAV levels cannot be compared between schemes, and a lower NAV does not mean a cheaper or better fund. The same applies to every cell carrying this mark.

Harbor Flexi Cap Fund

Flexi Cap - direct plan - growth

Price history 3,588 prices, 01-01-2013 to 01-10-2026. **Latest price (NAV)** 83.2722 on 01-10-2026.

The chart shows a sample of the daily prices; the figures use every price.

Harbor Flexi Cap Fund: returns, risk and your own money

The fund's own growth

Scheme CAGR (the fund's own growth, not your personal return)

Period	Total return	CAGR (a year)	Dates used
1 year	-17.42%	-17.43%	01-10-2025 to 01-10-2026
3 year	-2.13% [a]	-0.71% [a]	29-09-2023 to 01-10-2026
5 year	14.66%	2.77%	01-10-2021 to 01-10-2026

Rolling returns

Every available window, not a single start date.

Window	Median	Lowest	Highest	Windows above zero
1M	0.73%	-10.68%	16.61%	55.79%
3M	2.51%	-20.56%	26.17%	60.24%
6M	5.72%	-21.85%	37.57%	70.16%
1Y	11.90%	-18.89%	56.97%	80.16%
3Y	9.01%	-1.44%	31.30%	98.61%
5Y	9.46%	2.16%	25.90%	100.00%

Risk and risk-adjusted measures

Over the report period, from daily prices.

Measure	Value	Basis
Volatility (annualised)	14.66%	from 3587 daily returns
Sharpe ratio	0.26	RBI 91-day T-bill, see note 1
Sortino ratio	0.36	RBI 91-day T-bill, see note 1
Maximum drawdown	-24.79%	peak 05-06-2018, low 01-10-2018, recovered 04-11-2019

Beta and alpha: not available yet (no benchmark index is linked to this fund).

Your own money in this fund

Your return (XIRR, based on when your own money went in and came out)

Measure	Value	Detail
Your return (XIRR, a year)	5.83%	28-11-2016 to 01-10-2026
Value now	₹15,905	units x latest NAV, NAV of 01-10-2026
Amount you put in	₹9,103	first on 28-11-2016
Amount you took out	₹0	
Gain or loss	₹6,802	

The fund's own growth figures (such as CAGR, rolling returns, volatility and drawdown) show how the scheme performed whatever day anyone invested. Your return (XIRR) shows what you actually earned, because it follows the dates and amounts of your own investments and withdrawals. The two usually differ, and a difference does not mean either is wrong.

Trend

Latest value of each average, counted in price observations (not calendar days).

Measure	Latest	As at
SMA 20	86.3790	01-10-2026
SMA 50	88.7089	01-10-2026
SMA 100	90.5846	01-10-2026
SMA 200	94.6358	01-10-2026
EMA 20	86.1593	01-10-2026

Highest NAV in the period	103.7233 [b]	11-02-2026
Lowest NAV in the period	21.5052 [b]	19-07-2013
Average NAV (mean / median)	63.1675 / 69.2110 [b]	describes prices, not a return

a Prices are not published every day. Where a start or end date had no price, the latest earlier price (within 10 days) was used; each fund's own page shows the dates actually used. The same applies to every cell carrying this mark.

b NAV levels cannot be compared between schemes, and a lower NAV does not mean a cheaper or better fund. The same applies to every cell carrying this mark.

Comparing your funds

Your held schemes: only the funds you hold are compared with each other, and only against funds of the same category, plan and option.

Ranked by CAGR, within each category

Each fund is ranked only against your other funds of the same category, plan and option; its rank is in brackets (1 is the highest).

Fund	Category	1 year	3 year	5 year
Birch Flexi Cap Fund	flexi cap, direct plan, growth	5.13% (1)	10.49% (1)	3.65% (1)
Harbor Flexi Cap Fund	flexi cap, direct plan, growth	-17.43% (2)	-0.71% (2)	2.77% (2)

6 funds are not ranked: no other fund of the same category, plan and option, a category that is not known, or no figure for the period.

How closely your funds move together

Fund A	Fund B	Correlation	Common returns	Period
Aster Diversified Equity and Debt Hybrid Opportunities Allocation Fund - Direct Plan - Growth Option (formerly the Dune Balanced Advantage Fund)	Grove Large Cap Fund	0.16	54	17-07-2026 to 01-10-2026
Dune Corporate Bond Fund	Grove Large Cap Fund	0.15	54	17-07-2026 to 01-10-2026
Cedar Mid Cap Fund	Grove Large Cap Fund	0.11	54	17-07-2026 to 01-10-2026
Aster Diversified Equity and Debt Hybrid Opportunities Allocation Fund - Direct Plan - Growth Option (formerly the Dune Balanced Advantage Fund)	Cedar Mid Cap Fund	0.05	519	04-10-2024 to 01-10-2026
Birch Flexi Cap Fund	Cedar Mid Cap Fund	0.05	519	04-10-2024 to 01-10-2026
Birch Flexi Cap Fund	Harbor Flexi Cap Fund	0.03	3,587	01-01-2013 to 01-10-2026
Dune Corporate Bond Fund	Fjord ELSS Fund	0.02	2,887	08-09-2015 to 01-10-2026
Elm Gilt Fund	Fjord ELSS Fund	0.01	2,887	08-09-2015 to 01-10-2026
Cedar Mid Cap Fund	Harbor Flexi Cap Fund	0.01	519	04-10-2024 to 01-10-2026
Birch Flexi Cap Fund	Elm Gilt Fund	0.01	3,587	01-01-2013 to 01-10-2026

Showing the 10 most closely related of 28 pairs; the others are in the stored report. A correlation near 1 means the two funds usually rise and fall together; near 0, little relationship; below 0, they tend to move in opposite directions. It describes past returns only.

How this was calculated

Risk-free rate: RBI 91-day Treasury bill auction cut-off yield. 6.2% a year was in force at the start of the period (auction of 31-12-2012) and 6.2% at its end (auction of 28-09-2026), taken as the latest published rate on or before each date, never interpolated, and converted to a daily rate as (1 + yield) ^ (1 / 252) - 1. Source: Reserve Bank of India.
