

Household Financial Health Report — Monthly Review (portrait page before)

Mutual Fund Investment Report

Synthetic example narrative.

VALUATION DATE	REPORT DATE	BSE SENSEX	NIFTY 50
30-Sep-2026	30-Sep-2026	84,021.50 as at 30-Sep-2026	25,760.35 as at 30-Sep-2026

All amounts in Indian rupees (INR). Each owner section is complete on its own. Sections are not added together: entity holdings (HUF, trust, company) are kept apart from personal holdings, and a joint folio is shown once per owner at that owner's share.

(a) Systematic withdrawals (SWP) are included in the Red/SWP column. The platform's performance (R4) and tax (R6) engines do not process SWP, so for these funds the report works from the recorded transactions itself and its figures can differ from those engines' output. Applies to: Sample Nifty 50 Index Fund - Direct Plan - Growth (folio 77012345).

(b) Systematic transfer plan (STP) legs are shown as switch in / switch out. The platform's R4 and R6 engines do not process STP legs separately, so these funds' figures are calculated within this report only. Applies to: Sample Short Duration Fund - Direct Plan - IDCW (folio 9081726); Sample Nifty 50 Index Fund - Direct Plan - Growth (folio 9081726).

(c) Bonus units are added at nil cost and unit splits change the unit count only; neither is a cash flow, so neither appears in the purchase or dividend columns. Applies to: Sample Small Cap Fund - Regular Plan - Growth (folio 5521009/01).

(f) Where a figure carries a "from ..." marker it is calculated from the transactions in your uploaded statements only. Average NAV, unrealised gain, XIRR and realised gain cover units whose purchase is recorded; units bought before the earliest uploaded transaction are included in current value but not in those figures. Older history is not in the uploaded statements. Until MFCentral integration is available, you can request a full Consolidated Account Statement (CAS) from CAMS or KFinTech and upload it here. Applies to: Sample Nifty 50 Index Fund - Direct Plan - Growth (folio 77012345).

(m) A joint folio appears in each owner's section at that owner's ownership share (units and amounts scaled by the share; NAV, average days and XIRR are the same for every owner). Applies to: Sample Small Cap Fund - Regular Plan - Growth (folio 5521009/01).

(n) Realised gain uses first-in-first-out lot matching (the same lot functions as the Tax & Cost chapter, applied here to redemptions, SWP and switch/STP-out). It is not a tax computation. Average NAV is average cost. Because these two cost methods attribute cost differently, unrealised + realised + dividends will not always equal the overall gain.

Observation only.
